News Release

March 6, 2002

FOR IMMEDIATE RELEASE

ParaFX.com Announces Upgrades To DataCentre

During recent months, ParaFX.com has been working hard to enhance the operations of our Web hosting solution. Several upgrades have been implemented to provide additional reliability and redundancy.

Some key upgrades include:

- Our hosting and mail solutions have been enhanced with fiber optic data storage. Providing the highest data retrieval speeds and reliability available in today's market. Combined with our fault tolerant central storage array, customers can expect increased performance and reliability.
- A multi-peer arrangement has been implemented to provide redundant connectivity to our Datacentre.This arrangement also provides us with enhanced routing to core networks such as Rogers, AT&T and WORLDCOM / UUNET
- Additional servers for all web and mail farms. ParaFX.com has recently added additional servers to our existing server farms providing our customers further redundancy and greater performance.

In the unlikely case of system failure the current implementation tolerates over 50% failure of our core servers while still maintaining robust and uninterrupted service to our customers.

ParaFX.com has a constant goal to continue to grow and improve our solution for our customers, and this launch is another example of that determination at work.

About ParaFX.com
ParaFX.com is a privately owned Internet Hosting Services Provider operating in Toronto, Canada. ParaFX.com, unlike many other service providers, work with partners and clients to provide a higher and more personal level of service. ParaFX.com prides itself in being able to provide customers with direct support and service from the owners directly, which ensure customers get the support they require in record turn-around time. ParaFX.com is a leading provider of Web hosting services to graduating students of post-secondary institutions such as Humber College of Applied Arts and Technology. ParaFX.com meets the needs of new designers and developers in this industry by working directly with post-secondary institutions to provide a cost effective portfolio hosting solution to students upon completion of their educational career. ParaFX.com has developed and will continue to develop an extensive and expandable hosting infrastructure that will prove to have the means to offer services never before available from conventional hosting providers. Through our focused operation, we will pursue a level of hosting services that will continue to exceed client expectations.
