FOR IMMEDIATE RELEASE

ParaFX.com Launches Hosting For Humber Students

ParaFX.com assembles a hosting package specifically designed for Humber College graduates.

ParaFX.com is pleased to announce the creation of a custom hosting package for Humber College graduates.

ParaFX.com has been working over the past few months to develop and provide a hosting package that integrates the various technologies that students learn during their educational career at Humber. ParaFX.com was determined to provide a hosting configuration that could be used by students to host their portfolio sites as they make their way into the workforce.

Using information provided by student and professor feedback, such a hosting package was developed at a price point suited to students' budgets.

Students will be able to launch their portfolio or personal sites on ParaFX.com servers by Oct 31, 2001. During initial stages, ParaFX.com will be closely monitoring the progress and success of the launch. With that in mind, we will also be actively developing the system further as required. Humber students who host with our service are welcome to submit comments, concerns and suggestions.

About ParaFX.com

ParaFX.com is a privately owned Internet Hosting Services Provider operating in Toronto, Canada. ParaFX.com, unlike many other service providers, work with partners and clients to provide a higher and more personal level of service. ParaFX.com prides itself in being able to provide customers with direct support and service from the owners directly, which ensure customers get the support they require in record turn-around time. ParaFX.com is a leading provider of Web hosting services to graduating students of post-secondary institutions such as Humber College of Applied Arts and Technology. ParaFX.com meets the needs of new designers and developers in this industry by working directly with post-secondary institutions to provide a cost effective portfolio hosting solution to students upon completion of their educational career. ParaFX.com has developed and will continue to develop an extensive and expandable hosting infrastructure that will prove to have the means to offer services never before available from conventional hosting providers. Through our focused operation, we will pursue a level of hosting services that will continue to exceed client expectations.
